

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General Public Health and Marine-Hospital Service.]

STATISTICAL REPORTS OF STATES AND CITIES OF THE UNITED STATES, YEARLY AND MONTHLY.

CALIFORNIA—*Los Angeles*.—Month of November, 1905. Estimated population, 200,000. Total number of deaths, 246, including diphtheria 7, enteric fever 5, measles 1, whooping cough 2, and 53 from tuberculosis.

Stockton.—Month of November, 1905. Estimated population, 90,000. Total number of deaths, 25, including 1 from tuberculosis.

CONNECTICUT.—Reports to the State board of health for the month of November, 1905, from 165 towns, having an aggregate estimated population of 984,292, show a total of 1,254 deaths, including diphtheria 23, enteric fever 27, measles 3, scarlet fever 3, whooping cough 7, and 109 from phthisis pulmonalis.

Bridgeport.—Month of November, 1905. Estimated population, 82,128. Total number of deaths, 107, including diphtheria 3, enteric fever 1, scarlet fever 1, and 12 from tuberculosis.

Hartford.—Month of November, 1905. Estimated population, 92,000. Total number of deaths, 125, including diphtheria 1, enteric fever 1, whooping cough 1, and 12 from tuberculosis.

INDIANA.—The MONTHLY BULLETIN gives the following abstract of mortality statistics for October, 1905:

Total number of deaths reported, 2,681; annual rate, 11.9. In the preceding month, 3,018; rate, 13.6. In the corresponding month last year, 2,702 deaths; rate, 12. Deaths by important ages were: Under 1 year, 426, or 16.9 per cent of the total; 1 to 5, 221; 5 to 10, 89; 10 to 15, 46; 15 to 20, 88; 65 and over, 659, or 26.2 per cent of the total. Some important causes of death were: Tuberculosis, 307 (252 pulmonary and 55 other forms); typhoid fever, 152; diphtheria, 76; croup, 3; scarlet fever, 5; whooping cough, 14; pneumonia, 138; diarrheal diseases, 167; cerebro-spinal meningitis, 29; influenza, 4; puerperal fever, 9; cancer, 100; violence, 159; smallpox, none.

IOWA—*Davenport*.—Month of October, 1905. Estimated population, 42,000. Total number of deaths, 42, including diphtheria 3, and 3 from phthisis pulmonalis.

Month of November, 1905. Total number of deaths, 39, including diphtheria 2, and 4 from tuberculosis.

Keokuk.—Month of November, 1905. Census population, 14,641. Total number of deaths, 20, including enteric fever 1, whooping cough 1, and 2 from tuberculosis.

LOUISIANA—*New Orleans*.—Month of November, 1905. Estimated population, 325,000; white, 239,000, colored, 86,000. Total number of deaths, 535; white, 333, colored, 202, including diphtheria 4, enteric fever 5, smallpox 1, yellow fever 6, and 80 from tuberculosis.

MICHIGAN.—The total number of deaths returned to the secretary of state for the month of November was 2,644, representing a total death rate of 12.6 per 1,000 population. A slight falling off from the rate of the previous month, 13.1, is observed.

There were 445 deaths of infants under 1 year of age; 164 deaths of children aged 1 to 4 years, inclusive, and 791 deaths of persons aged 65 years and over.

Important causes of death were as follows: Tuberculosis of the lungs, 163; other forms of tuberculosis, 26; typhoid fever, 93—a decrease of 9 from the number returned for October; diphtheria and croup, 71; scarlet fever, 22; measles, 3; whooping cough, 11; pneumonia, 187; diarrheal diseases of infants under 2 years, 74; influenza, 17; cancer, 143; accidents and violence, 158.

The deaths from pneumonia more than doubled in number as compared with the preceding month, and influenza also increased, although the total number of deaths from this cause was only 17. A marked decrease was shown in diarrheal diseases.

There was one death from smallpox, which occurred in the city of Alma, Gratiot County.

MINNESOTA—*Minneapolis*.—Month of November, 1905. Census population, 261,974. Total number of deaths, 215, including diphtheria 5, enteric fever 10, and 26 from tuberculosis.

NEBRASKA—*Omaha*.—Month of July, 1905. Census population, 102,555. Total number of deaths, 77, including diphtheria 1, enteric fever 1, whooping cough 1, and 2 from tuberculosis.

Month of August, 1905. Total number of deaths, 81, including enteric fever 1, whooping cough 2, and 7 from tuberculosis.

NEW HAMPSHIRE—*Manchester*.—Month of November, 1905. Estimated population, 62,000. Total number of deaths, 103, including diphtheria 7, and 8 from tuberculosis.

NEW YORK—*Auburn*.—Month of November, 1905. Estimated population, 38,500. Total number of deaths, 36, including diphtheria, 2, enteric fever 1, whooping cough 1, and 7 from tuberculosis.

Buffalo.—Month of November, 1905. Estimated population, 400,000. Total number of deaths, 450, including diphtheria 5, enteric fever 5, measles 1, whooping cough 4, and 41 from tuberculosis.

OHIO—*Cleveland*.—Month of November, 1905. Estimated population, 440,000. Total number of deaths, 502, including diphtheria 11, enteric fever 6, scarlet fever 4, whooping cough 1, and 55 from tuberculosis.

Toledo.—Month of September, 1905. Census population, 131,822. Total number of deaths, 178, including diphtheria 1, enteric fever 16, and 18 from tuberculosis.

Month of October, 1905. Total number of deaths, 142, including diphtheria 2, enteric fever 5, scarlet fever 1, and 16 from tuberculosis.

TENNESSEE—*Nashville*.—Month of November, 1905. Estimated population, 94,605; white, 59,426; colored, 35,179. Total number of deaths, 117; white, 58; colored, 59, including enteric fever 4, and 21 from tuberculosis.

WASHINGTON—*Seattle*.—Month of November, 1905. Estimated population, 160,000. Total number of deaths, 76, including enteric fever 1, and 6 from tuberculosis.

Tacoma.—Month of November, 1905. Estimated population, 75,000. Total number of deaths, 68, including diphtheria 1, enteric fever 3, and 9 from phthisis pulmonalis.

Smallpox in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, June 30 to December 22, 1905.

For reports received from December 30, 1904, to June 30, 1905, see PUBLIC HEALTH REPORTS for June 30, 1905.

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semi-annually and new tables begun.]

FOREIGN AND INSULAR.

Instructions to consuls at seaports in continental Europe and in Great Britain relative to Russian emigrants.

On request of the Secretary of the Treasury the Department of State issued the following amended instructions by telegraph December 5 to the consuls at Liverpool, Southampton, Hamburg, Bremen, Antwerp, Rotterdam, and Havre, and a circular of instruction was issued to the other consuls at seaports in continental Europe and in Great Britain :

All immigrants from Russia must be detained five days at the port of embarkation for the United States under medical observation, and if during such detention any quarantinable disease appears or is suspected among them further detention and disinfection must be imposed, as provided by the Treasury regulations. If, however, the American consul or consular agent is satisfied that inspection of Russian immigrants and whatever disinfection of baggage that may be necessary has been accomplished at the Russian frontier, the time occupied in transit by said immigrants from the Russian frontier to the port of embarkation to the United States may be counted in the five days detention required by the United States regulations.

AFRICA.

Report from Cape Colony—Examination of rodents for plague infection.

The report of the medical officer of health of Cape Colony shows that during the week ended November 4, 1905, no case of plague was discovered. Out of a large number of rats and mice examined bacteriologically, 1 mouse found at Port Elizabeth was plague infected. No plague-infected rats or mice were found at King Williams Town or in the other districts of the colony. One case of plague remains under treatment at the plague hospital, Port Elizabeth. Bulletins regarding King Williams Town have been suspended, no plague-infected rodents having been found at that place since September 11.

BRAZIL.

Reports from Rio de Janeiro—Inspection of vessels—Mortality—Plague, smallpox, and yellow fever.

Acting Assistant Surgeon Stewart reports, November 8 and 22, as follows:

During the two weeks ended November 5, 1905, the following vessels were given bills of health from this consulate-general: On October 23, the British steamship *Norman Prince*, for New York, with a cargo

of coffee, no passengers, and no change in the personnel of the crew while in this port; on the same date, the British steamship *Massapequa*, for New York, with a miscellaneous cargo, no passengers, and no change in the crew personnel while here; on October 25, the British steamship *Monsdale*, with a cargo of coffee, no passengers, and with one new member of the crew taken on at this port; on October 26, the Belgian steamship *Camoens*, for New York, with a cargo of coffee, no passengers, and no change in the personnel of the crew while in this port; on the same date, the British steamship *Hannah M. Bell*, for New Orleans, in water ballast, with no passengers, and with no change in the personnel of the crew while here.

On October 30 the British steamship *Thorndale*, for Pensacola, with water ballast, no passengers, and no change in the crew personnel; on October 31 the British steamship *Swainley*, for Philadelphia, with cargo of manganese ore, no passengers, and no change in the crew personnel while here; on the same date the British steamship *Lord Stanley*, for New Orleans, with a cargo of coffee, no passengers, and no change in the crew personnel; on the 3d instant the British steamship *Tennyson*, with a cargo of coffee, 18 first-class and 7 steerage passengers for New York, and 1 new member of the crew taken on in this port, and on the 4th instant the British steamship *Cycle*, for Baltimore, in water ballast, no passengers, and no change in the personnel of the crew while here.

Week ended October 29, 1905: Total deaths, 314, including 1 from yellow fever, with 3 new cases reported, of which number 2 were confirmed and the remaining 1 placed under observation; 1 from plague, with a report of 8 new cases, and 2 from variola, with 12 new cases. At the close of the week there were 1 case of yellow fever, 50 cases of smallpox, and 10 cases of bubonic plague (with 13 cases under observation) in the hospital of São Sebastião.

During the 2 weeks ended November 19, 1905, the following vessels received bills of health from this consulate-general: On the 9th instant the British steamship *Kilnsea*, for New Orleans, in ballast, with no passengers, and no change in the crew personnel; on the 10th instant the British steamship *Titian*, for New York, with a cargo of coffee, no passengers, and with no change in the personnel of the crew; on the 13th instant the British steamship *Castillian Prince*, for New York, with a cargo of coffee, no passengers, and with no change in the personnel of the crew; on the 14th instant the Portuguese bark *Soares da Costa*, for Pensacola, in ballast, no passengers, and no change in crew; on the 16th instant the British steamship *Ambassador*, for Galveston, no passengers, in ballast, and no change in crew; on the 18th instant the British steamship *Lord Roberts*, for New Orleans, with coffee, no passengers, and no change in crew; on the same date the German steamship *Catania*, for New York, with coffee, no passengers, and no change in crew, and on the same date the British steamship *Cyfarthfa*, for Galveston, in ballast, no passengers, and no change in the crew personnel.

Week ended November 12, 1905: Total deaths, 281. Yellow fever caused 3 deaths—all among foreigners—with a report of 5 new cases, of which number, however, only 1 was confirmed as being the true disease; bubonic plague caused 5 deaths, with 12 new reported cases, and variola caused 3 deaths, with 6 new cases.

At the close of the week there were in the Hospital São Sebastião 42 cases of variola, 13 cases of bubonic plague, 1 case of yellow fever, and 7 cases of infectious diseases under observation.

Week ended November 19, 1905: Total deaths for the week, 283. Causes of deaths: Yellow fever, 2, with 5 new cases reported, of which number 2 were confirmed as being true yellow fever, and the remaining 3 were placed under observation. Bubonic plague caused 5 deaths, with 14 new cases reported. Variola caused 3 deaths, with 5 new cases reported. At the end of the week there were in the Hospital São Sebastião 33 cases of variola, 9 cases of plague, with 10 supposed cases under observation; and no cases of yellow fever.

Report from Bahia—Plague.

BAHIA, BRAZIL, *December 14.*

Five cases plague, 3 deaths.

ROWE, *Vice-Consul.*

BRITISH HONDURAS.

History of yellow fever death at Belize reported November 28, 1905.

R. H. Peters, formerly acting assistant surgeon at Belize, reports from Mobile, Ala., December 11, as follows:

At Belize there was one death reported from yellow fever November 28.

The patient, a young Englishman, arrived in Belize November 11 from England. On the 15th he went to Stann Creek, which is about 20 miles from Belize, was taken sick on November 21, and on the 26th was brought back to Belize, where he died on the 28th. The diagnosis was confirmed by the necropsy. Sporadic cases of yellow fever still appear along the Guatemala railroad.

Report from Shanghai—Inspection of vessels.

Acting Assistant Surgeon Ransom reports, November 9, as follows:

During the week ended November 4, 1905, 2 supplemental bills of health were issued to 2 steamers, and there were inspected 2 vessels, 185 crew, and 46 steerage passengers. There were disinfected 8 pieces of baggage, and 1 piece was examined and passed. Manifests were viséed for 34,472 pieces of freight. Eight emigrants for San Francisco per steamship *Doric* were examined and passed.

There were no reports of quarantinable disease received from outports.

CUBA.

Reports from Habana—Inspection of vessels—Yellow fever—Measures for preventing spread of yellow fever.

Passed Assistant Surgeon von Ezdorf reports, December 2, 15, and 18, as follows:

Week ended December 9, 1905:

Vessels inspected.....	24
Passengers inspected.....	503
Crew inspected.....	1,119
Certificates issued to passengers for Panama.....	—
Vessels fumigated prior to sailing.....	—

During the week 13 cases and 3 deaths from yellow fever were reported for the city of Habana. One case of yellow fever was reported at Alacranes, a station between Habana and Matanzas. One of the cases had been diagnosed November 29, but it is included in this report, as the case was not reported to this office until the 6th instant.

I have been informed that the authorities propose to hold laborers for five days in detention before permitting them to travel to the interior of the island.

It is recognized that a great source of danger is from the influx of Spanish immigrants, who live in a crowded condition in the city. These people, when taken sick, move from place to place until required to call in medical assistance, thus spreading infection, if the case is one of yellow fever, and thereby increasing the number of unknown foci. The authorities also contemplate controlling the influx of immigrants to the city.

The authorities have 7 fumigating squads of 25 men in each. This force is to be increased by 5 more squads of 25 men each on the 11th instant. Sulphur is being used more generally for fumigating purposes.

At present 68 men compose the oiling forces, which will also be increased by 30 men on the 11th instant.

There is one screening squad of 12 men who screen the rooms of suspects reported when such are not transferred to Las Animas Hospital.

There are 12 inspectors who report on the sanitary condition of houses inspected.

Eight physicians are employed to inspect all nonimmunes in the infected district.

DECEMBER 15.

No new cases; 1 death, yellow fever, reported yesterday.

DECEMBER 18.

Three new cases yellow fever confirmed 15th instant.

Summary of yellow fever cases in Cuba.

DECEMBER 14.

Total yellow fever cases in Cuba since October 17 till present date, 57, among which one developed at Matanzas City, another at Alacranes, and a third at Real Campina, Santa Clara Province. All apparently infected in Habana. Largest number in treatment at any time, 22, December 6; to-day, only 16. * * *

FINLAY.

Reports from Matanzas—History of yellow fever cases at Union de Reyes and Colon—Precautions against spread of yellow fever.

Acting Assistant Surgeon Nuñez reports, December 8, 11, and 12, as follows:

The town of Union de Reyes, of 3,000 inhabitants, is situated at a distance of about 30 miles to the south of Matanzas, having daily communication by railway with this city. Within 4 miles from Union de Reyes is the town of Alacranes, having about the same number of

inhabitants and also connected by railway with this city. At a place equidistant between the two towns referred to there is a sugar plantation called "Valiente."

It was at this place that the death from yellow fever occurred yesterday. The case was in the person of a Spaniard, who recently arrived at Habana from his native country as an immigrant. He was transferred, as usual, on his arrival at Habana, from the steamer to the isolation station of Triscornia, awaiting employment. Shortly after, and during the latter part of November, he went from Triscornia to spend a few days with a friend in Habana, where he evidently contracted the disease. He arrived at the plantation November 29, went to work on the following day feeling apparently well, and was taken sick December 1. No physician was called to visit the case until the sixth day of the disease and when the patient was in a preagonic condition. The attending physician reported the case to the local health officer at Union de Reyes during the evening of the 6th instant, and he went to visit the case in order to verify the diagnosis on the morning of the 7th, shortly before the patient died. The provincial sanitary inspector, who resides in this city, was telegraphed for, and a post-mortem examination was held yesterday, in which were found the typical pathological lesions common to yellow fever.

The building in which the patient died, which is said to be an old blockhouse, was disinfected with sulphur after the death of the patient occurred.

As a result of an investigation, it was ascertained that over 300 non-immunes, mostly Spanish immigrants of recent arrival, are living at the same plantation, where they are at present employed as laborers. Therefore it is feared that as no sanitary measures could possibly be observed during the infective stage of the disease, inasmuch as its presence was not detected in time, the contagion has spread and new cases may develop in the future among the laborers of the plantation. In view of further issues, it has been recommended to prepare a room, conveniently screened with wire netting, at the plantation, in which to treat all cases of fever among the nonimmunes, and to subject these to a daily medical inspection for a period of not less than fifteen days, counting from the time of death of the first case.

Up to the present time there have been no new cases of the disease reported within the city limits.

DECEMBER 12.

The origin of the infection in the yellow fever case reported December 11, at Colon, as in the previous cases recently reported in Matanzas, has been ascertained to have been Habana. It occurred also in a Spanish immigrant who arrived in Habana from his native country November 18 last. After being detained at the quarantine station at Triscornia, as customary, he was released and went to the known infected district in that city. On the 27th instant he went to a sugar plantation near the rural town of Real Campiña, which belongs to the municipal district of the city of Cienfuegos, and is close to the boundary line between the provinces of Matanzas and Santa Clara. The beginning of the disease has been traced to the 5th instant, so that it was not detected until the sixth day of its invasion.

The patient was transferred from the plantation to the town of Real Campiña and thence to Colon, where the diagnosis of yellow fever

was decided. The town of Colon is about 60 miles to the southeast of Matanzas, having daily communication with this city by railway.

The transfer of the patient from Real Campiña to Colon was due to the fact that there is no hospital at the former place.

The patient has been isolated at the civil hospital of Colon, where he is now undergoing treatment. The disease is not considered to be of a very severe type, and is expected to have a favorable termination.

It is said that many other nonimmunes, immigrants from Spain, are living at the plantation where the case occurred, and also at Real Campiña, and it is possible that the contagion may have spread among them, giving rise to future cases.

Inspection of vessels—Yellow fever in Matanzas Province.

During the week ended December 9, 1905, 5 bills of health were issued to vessels leaving for United States ports. One of these, the British schooner *Glenafon*, originally from Mobile, was subjected to precautionary quarantine up to December 9, when she cleared for Mobile direct.

The quarantine which has been maintained at Matanzas against all the Gulf ports of the United States since the outbreak of yellow fever at New Orleans was raised on the 9th instant in compliance with telegraphic orders from the Cuban secretary of finance.

Since the death from yellow fever, reported December 7, at the sugar plantation called "Valiente," about 2 miles from the town of Union de Reyes, no new cases have been reported in the city nor within its municipal district.

DECEMBER 14.

First case of yellow fever reported at Colon (Matanzas Province), died yesterday.

One case of yellow fever reported to-day at Valiente Plantation, Union de Reyes.

DECEMBER 17.

Last cases reported Colon (Matanzas Province), one confirmed; the other not yellow fever.

Reports from Santiago—Inspection of vessels—Malarial fever on steamship Leander—Mortality.

Acting Assistant Surgeon Wilson reports, December 5 and 12, as follows:

Week ended December 2, 1905:

Bills of health issued to 4 vessels bound for the United States.

No quarantinable disease has been reported.

Mortality for the week ended December 2, 1905, 16.

Annual rate of mortality for the week, 18.28 per 1,000. Estimated population, 45,500.

Week ended December 9, 1905.

Only 1 bill of health issued to a vessel bound for the United States.

No quarantinable disease has been reported.

The Norwegian steamship *Leander*, which left to-day for a port in the United States (probably Baltimore or Philadelphia) via Daiquiri,

had 8 cases of malaria among the crew. The last case was still sick to-day. The vessel was fumigated on arrival by the Cuban quarantine service, who kept the sick men under observation.

Mortality for the week ended December 9, 1905, 21.

Annual rate of mortality for the week, 24 per 1,000.

ECUADOR.

Report from Guayaquil—Mortality—Yellow fever and smallpox—Deaths from yellow fever on steamship Craigard—Inspection and fumigation of vessels.

Acting Assistant Surgeon Gruver reports, November 25, as follows: Twelve days ended November 26, 1905:

Present officially estimated population 60,000. Mortality from all causes 87, including 3 from yellow fever and 5 from smallpox.

The exact condition of smallpox at this port is unknown, as deaths alone are reported. It is impossible to arrive at the number of cases which occur, but the number of people seen on the streets with faces freshly pitted from recent attacks would indicate that this disease is very prevalent. In Quito it is epidemic, and by presidential decree vaccination is made obligatory.

To-day the captain of the British steamship *Craigard* died of yellow fever. This vessel has been anchored in midstream opposite the city for a month, discharging coal. As the deceased passed most of his time on shore it is probable that he contracted the disease on land.

On November 17 the steamship *Colombia*, from Chilean and Peruvian ports, cleared for Ancon, Canal Zone, with 4 cabin and 8 steerage passengers from this place; 5 cabin and 12 steerage passengers from ports south were placed in quarantine to complete ten days from last exposure. On the same date the steamship *Masconomo*, a tramp steamer from New York via South American ports, cleared for New York via Peruvian and Chilean ports. No passengers. November 22 steamship *Palena*, from Chilean and Peruvian ports, cleared for Ancon, Canal Zone, with 12 cabin and 2 steerage passengers; 6 steerage passengers from southern ports were placed in quarantine. These vessels were fumigated before sailing.

GERMANY.

Reports from Berlin—Summary of cholera in Germany—Supervision of river traffic suspended.

The following is received from Ambassador Tower through the Department of State under date of November 20:

Isolated cases of cholera, which are undoubtedly connected with former cases, were observed and reported to October 16, though no death from cholera has occurred in Germany since October 7, and the disease is therefore considered to have been completely arrested.

From August 16 to October 16, inclusive, the total number of cases of cholera observed was 287, of which 93 were fatal.

The supervision of the river traffic on the Elbe and the Oder, which has heretofore been maintained in order to prevent the introduction

of cholera through boats and rafts coming down from the country of the Vistula, has been suspended on account of the freezing of the streams, though the announcement is made that suitable precautionary measures will be adopted to prevent the reintroduction of cholera next spring when the rivers are again open.

Status of cholera in Russia.

Passed Assistant Surgeon McLaughlin reports, December 1, as follows:

According to the official bulletin, there were registered in the Vistula district of Russia, during the week ended November 15, 18 fresh cases of cholera (with 8 deaths), of which 12 cases (7 deaths) occurred in the district of Kolno, 1 case (1 death) in the district of Ostrow, and 5 cases in the city of Lodz. The total number of cases in the Vistula district up to the middle of November amounts to 249 (with 136 deaths).

HONDURAS.

Report from Puerto Cortez—Yellow-fever situation.

Consul Johnson reports, November 21, as follows:

Since my cablegram of the 15th instant I have the following report to make on the yellow-fever situation in this consular district: Puerto Cortez, 2 cases, 1 death; San Pedro, 4 cases, 1 death; Choloma, 2 cases, 1 death.

At San Pedro a meeting composed of the board of health and the governor of the department was held on the 15th instant at the office of the consular agent at San Pedro and it was voted to take active steps to prevent the spread of the disease.

ITALY.

Report from Naples—Inspection of vessels—Rejections of emigrants recommended—Smallpox.

Acting Assistant Surgeon Buonocore reports, November 27, as follows:

During the week ended November 25, 1905, the following ships were inspected at Naples and Palermo:

NAPLES.

Date.	Name of ship.	Destination.	Steerage passengers inspected and passed.	Pieces of large baggage inspected and passed.	Pieces of baggage disinfect.
Nov. 19	Florida	New York	533	120	650
19	Georgia	do	339	45	400
21	Cretic	do	461	100	730
21	Nord America	do	658	75	850

PALERMO.

Nov. 20	Georgia.....	5				1	6
---------	--------------	---	--	--	--	---	---

Smallpox.—For the week ended November 23, 1905, there were reported 3 cases in the province of Rome, 2 cases at Terranova (Caltanissetta), 1 case at Cento (Ferrara), 3 cases at Catania, and 1 case at Troina (Catania), 1 case at St. Agata Bolognese (Bologna).

Week ended November 30, 1905: Three cases in the province of Catania, 1 case at Genzano (Potenza), 2 cases at Genoa, 2 cases at Budrio (Bologna), 1 case at Belluno, 3 cases at Tiesi (Sassari-Sardinia).

JAPAN.

Report from Yokohama—Inspection of vessels—Plague in Kobe and Osaka.

Passed Assistant Surgeon Moore reports, November 18, as follows:

During the week ended November 11, 1905, bills of health were issued, after inspection, to 7 steamships having an aggregate personnel of 695 crew and 532 passengers; 116 steerage passengers were bathed and their clothing was disinfected; 382 aliens, would-be steerage passengers to the United States, were examined with special reference to their freedom from any loathsome or dangerous contagious disease contemplated by the United States immigration laws.

Plague.—This disease continues to spread in Osaka and Kobe. In the former city 18 probable cases, with 14 deaths, occurred during the period October 27 to November 15. In Kobe for the period November 8 to 15, 7 cases were reported. A plague-infected rat was discovered recently in Tokyo. Thus the present plague situation in Japan justly gives rise to considerable apprehension, tempered, however, by the recollection of the success which has attended the efforts of the authorities in coping with previous outbreaks of this infection. It again may be noted that a large proportion of Japanese emigrants for Hawaii, even of those taking passage at Yokohama, pass through Kobe and Osaka en route. The situation seems to demand extraordinary precautions.

MEXICO.

Report from Veracruz—Summary of transactions of service—Yellow fever.

Passed Assistant Surgeon Wilson reports, December 2, as follows:
Transactions at this station for the period from July 1 to December 1, 1905—

Steamers inspected	135
Sailing vessels inspected	11
Steamers fumigated to kill mosquitoes	36
Sailing vessels fumigated to kill mosquitoes	1
Number of crew inspected	6, 231
Number of passengers inspected	3, 369

One case of yellow fever occurred on board a vessel which subsequently went to a port in the United States. The infection, however, came from elsewhere, as the man was sick before the vessel arrived here. After the first case of yellow fever was reported in Veracruz the temperatures were taken of all persons on board vessels bound direct for southern United States ports.

November 25 to the end of the season, December 1, 1905:

Vessels inspected and bills of health issued	6
Vessels departing on which mosquitoes (culex), a few, found	4
Crew inspected	388
Passengers inspected	316

No cases nor deaths of yellow fever were reported during this period.

PANAMA.

Report from Colon—Inspection of vessels—Summary of transactions July 1 to November 30, 1905.

Acting Assistant Surgeon Mohr reports, December 5, as follows:

During the week ended December 5, 1905, the following vessels cleared for ports in the United States and were granted bills of health:

American steamship *Advance* for New York, November 29, with 63 crew and 17 passengers.

German steamship *Virginia* for New York, November 29, with 70 crew and 179 passengers (170 deck passengers for Kingston, Jamaica).

Norwegian steamship *Saphir* for New Orleans, November 30, with 18 crew and no passengers; fumigated.

British steamship *Trent* for New York, via Kingston, Jamaica, December 1, with 174 crew and 453 passengers, of which 350 were deck passengers for Kingston.

Italian steamship *Centro America* for Ponce, P. R., December 2, with 104 crew and 18 passengers, via South American ports.

German steamship *Venetia* for New York, via Kingston, Jamaica, December 5, with 77 crew and 5 passengers for New York and 115 for Kingston.

Summary of transactions at the port of Colon, Republic of Panama, from July 1 to November 30, 1905.

	July.	August.	September.	October.	November.	Total.
Steamers inspected	23	21	16	17	20	97

PERU.

Report from Callao—Plague—Smallpox in Chile—Case of suspect plague on steamship Pizarro at Paita not bacteriologically verified.

Assistant Surgeon Lloyd reports, November 22, as follows:

Plague, October 11 to October 31, inclusive.

	New cases.	Cured.	Died.	Remain- ing.
Lima	8	4	6	9
Callao.....	1	0	0	1
Paita.....	1	1	1	13
Chiclayo.....	1	0	1	0
Mollendo.....	1	0	1	1
Trujillo ^a				
Total.....	12	5	9	24

^a No report.

Bills of health from Valparaiso report 200 cases of smallpox, with 40 deaths, for the 2 weeks ended November 4; from Coquimbo, Chile, 17 cases and 4 deaths for the 2 weeks ended November 5; from Antofagasta, Chile, 48 cases of smallpox, with 13 deaths, for the 2 weeks ended November 7; from Iquique, Chile, 20 cases of smallpox, with 22 deaths, for the 2 weeks ended November 9. Six cases of plague, with 1 death, are reported from Antofagasta (same period).

The British steamship *Pizarro* arrived from Panama and Guayaquil on November 15, a suspicious case (plague) having been removed from the vessel in Paita. Official reports state that the case presents all the clinical symptoms of plague, but it has not yet been confirmed bacteriologically. I hope, through the kindness of Doctor Arce, to secure material for animal inoculation, as the matter is of very great interest. It is known positively that this man did not go on shore in Panama, and if he has plague he must have contracted it on board ship.

Sanitary Inspector Romero removed a suspicious case from the *Santiago* on her last trip north, but this proved not to be plague.

Very nearly all the Chilean steamers on this line are now fitted up with sulphur furnaces and steam-disinfecting chambers, and the English line has placed orders for apparatus.

A new sulphur furnace has been installed in Callao and is in good working order.

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—UNTABULATED.

BAHAMAS—*Dunmore Town*.—Two weeks ended December 2, 1905. Estimated population, 1,232. Two deaths. No contagious diseases.

Governors Harbor.—Week ended December 2, 1905. Estimated population, 1,500. No deaths and no contagious diseases reported.

Green Turtle Cay.—Two weeks ended November 30, 1905. Estimated population, 3,314. No deaths and no contagious diseases reported.

Long Cay.—Week ended November 4, 1905. Estimated population, 3,626. No deaths and no contagious diseases.

Nassau.—Two weeks ended December 2, 1905. Estimated population, 12,650. Number of deaths not reported. No contagious diseases reported.

BRAZIL—*Pernambuco*.—Two weeks ended October 31, 1905. Estimated population, 200,000. Total number of deaths 360, including enteric fever 3, measles 2, whooping cough 2, smallpox 93, plague 5, and 52 from tuberculosis.

CANADA—*British Columbia*—*Victoria*.—Month of November, 1905. Estimated population, 21,000. Total number of deaths 16, including enteric fever 2, scarlet fever 1, and 2 from phthisis pulmonalis.

Quebec.—*Sherbrooke*.—Month of November, 1905. Estimated population, 13,364. Total number of deaths 35, including diphtheria 3, measles 10, and 1 from whooping cough.

FRANCE—*Roubaix*.—Month of November, 1905. Estimated population, 124,600. Total number of deaths, 149, including diphtheria 2, enteric fever 1, and 1 from whooping cough.

Rouen.—Month of October, 1905. Census population, 116,316. Total number of deaths, 156, including diphtheria 1, enteric fever 1, whooping cough 3, and 45 from tuberculosis.

GIBRALTAR.—Two weeks ended November 26, 1905. Estimated population, 27,460. Total number of deaths, 10. No deaths from contagious diseases reported.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 76 great towns in England and Wales during the week ended November 25, 1905, correspond to an annual rate of 17.9 per 1,000 of the aggregate population, which is estimated at 15,609,377.

London.—One thousand seven hundred and thirty-nine deaths were registered during the week, including measles 48, scarlet fever 6, diphtheria 10, whooping cough 24, enteric fever 3, and 11 from diarrhea. The deaths from all causes correspond to an annual rate of 19.4 per 1,000. In Greater London 2,342 deaths were registered. In the "outer ring" the deaths included 6 from diphtheria, 3 from measles, 2 from scarlet fever, 4 from whooping cough, and 4 from diarrhea.

Salford.—Three months ended September 30, 1905. Estimated population, 231,514. Total number of deaths, 1,099, including diphtheria 18, enteric fever 9, measles 15, scarlet fever 21, whooping cough 16, and 71 from tuberculosis.

Ireland.—The average annual death rate represented by the deaths registered during the week ended November 25, 1905, in the 21 principal town districts of Ireland was 21.4 per 1,000 of the population, which is estimated at 1,093,959. The lowest rate was recorded in Kilkenny, viz, 4.9, and the highest in Newry, viz, 37.8 per 1,000. In Dublin and suburbs 173 deaths were registered, including enteric fever 2, scarlet fever 1, 3 from whooping cough, and 27 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended November 25, 1905, correspond to an annual rate of 21.9 per 1,000 of the population, which is estimated at 1,749,917. The lowest rate of mortality was recorded in Perth, viz, 12.2, and the highest in Greenock, viz, 29.7 per 1,000. The aggregate number of deaths registered from all causes was 735, including measles 48, diphtheria 8, enteric fever 3, scarlet fever 1, and 10 from whooping cough.

JAVA—*Batavia*.—Three weeks ended November 11, 1905. Estimated population, 160,000. Total number of deaths not reported. No contagious diseases.

ST. HELENA.—Four weeks ended November 18, 1905. Estimated population, 3,800. Total number of deaths, 4. No deaths from contagious diseases.

SPAIN—*Barcelona*.—Ten days ended November 30, 1905. Estimated population, 600,000. Total number of deaths, 406, including diphtheria 6, enteric fever 11, measles 6, smallpox 5, and 32 from tuberculosis.

Corunna.—Month of November, 1905. Estimated population, 50,000. Total number of deaths, 127, including enteric fever 9, and 13 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, June 30 to December 22, 1905.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State, and from other sources.]

[For reports received from December 30, 1904, to June 30, 1905, see PUBLIC HEALTH REPORTS for June 30, 1905.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
